## BBO MATHS FREE SATS ANALYSIS WORKSHOP

**BBO Maths Hub is holding a FREE SATS analysis workshop for Maths Leaders, Year 6 teachers and Year 7 teachers on Friday 12<sup>th</sup> July at 1:00 – 4:00 pm.**

We are offering the opportunity for *Primary schools to look at some common features within the 2024 SATs and analyse your own papers. Secondary schools are invited too, to support transition knowledge. How can you use common themes from Year 6 pupils to develop your maths curriculum for next year as they move into Year 7?*

- What were the common errors and misconceptions?
- What can primary schools learn from how their pupils' tackled questions and implement in their planning for next year?
- What can secondaries learn about the current Y6 pupils- what can we put in place for them in Y7?

You will also be invited to join Basecamp where you can view pupils' responses to questions and submit your own examples to work on within the session.

**Primary schools:** Please ensure that you have downloaded scripts of a range of pupils prior to the session as you will have the opportunity to work on these with others and analyse pupil approaches.

**Secondary Schools:** The KS2 2024 SATs maths papers will be available for viewing on Basecamp from 11th July.
